

# GOAL CLICK: POP-UP POLAROIDS STEP-BY-STEP GUIDE

You will need:

- Scissors
- Glue Stick
- Card (to print your template on)

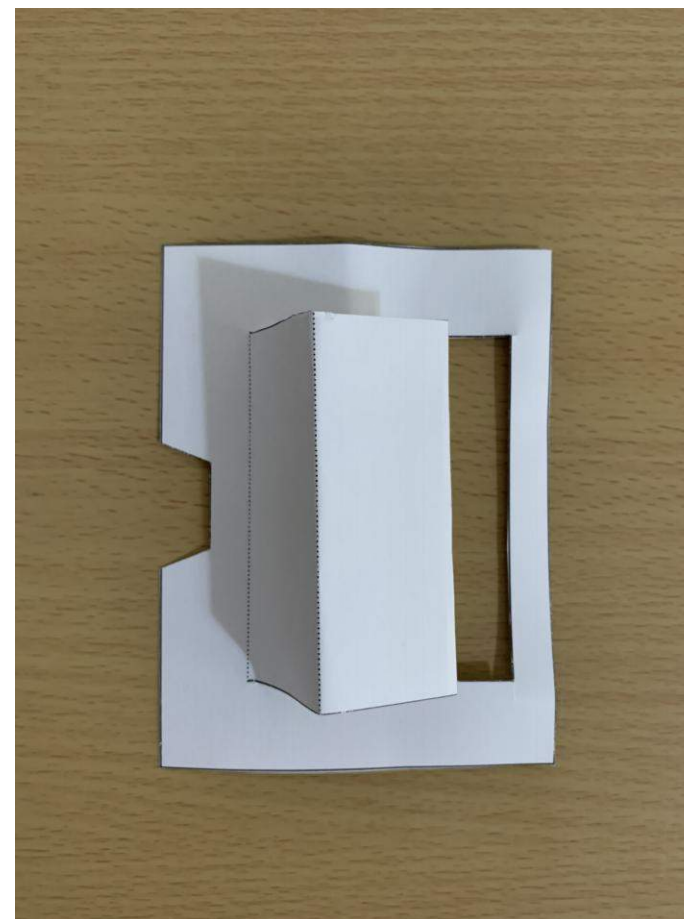

Step 1: Cut out each individual piece  
(front, back, photograph, interior,  
camera).

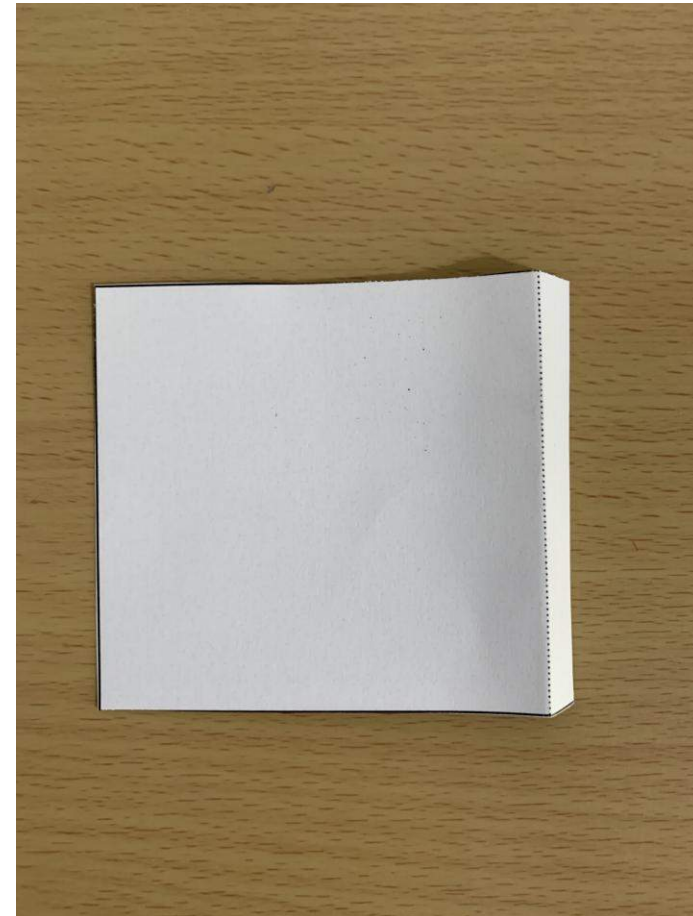

Step 2: On the camera itself, cut out the white slip and test that the photograph is able to slide through smoothly.

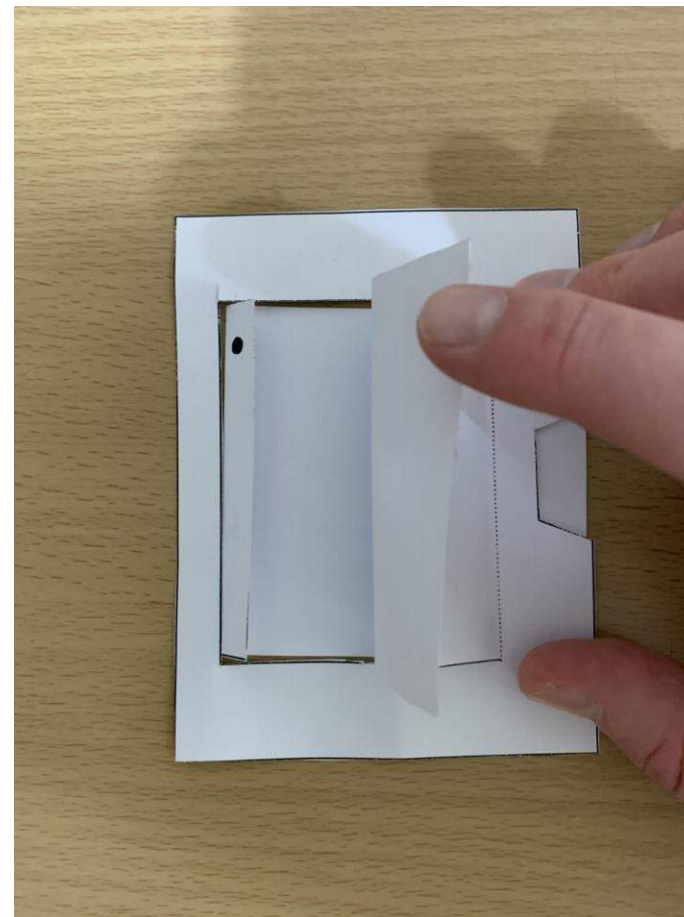

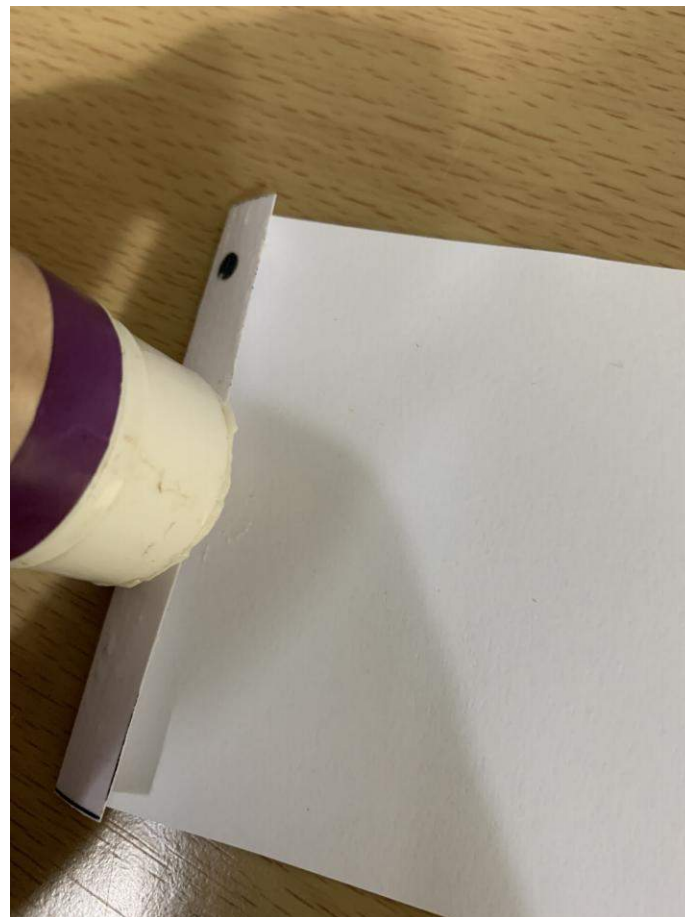

Step 3: On the 'front' piece, cut along the inside black lines and fold along both sets of dotted lines.

Step 4: On the 'interior' piece, fold along the dotted line.

Step 5: Glue the 'interior' piece along the tab (marked with a black dot in the photograph). Stick this to the underside of the 'front' piece flap.

Step 6: Glue the camera onto the top part of the 'front' piece flap so that the slip where the photograph comes out is just visible.

Step 7: Slide the photograph into the slip cut out of the camera until no more white on the photograph can be seen.

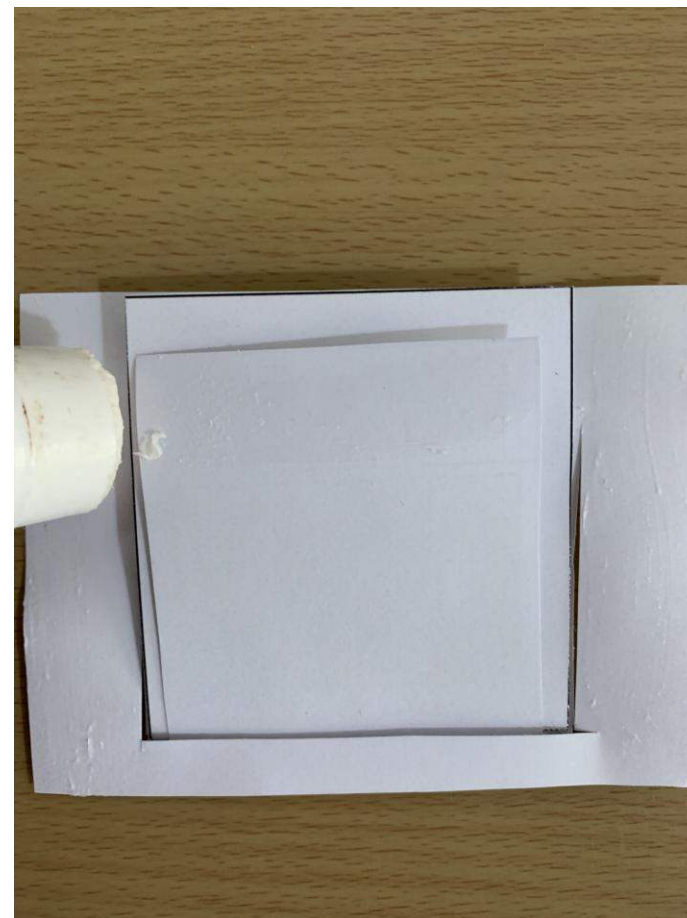

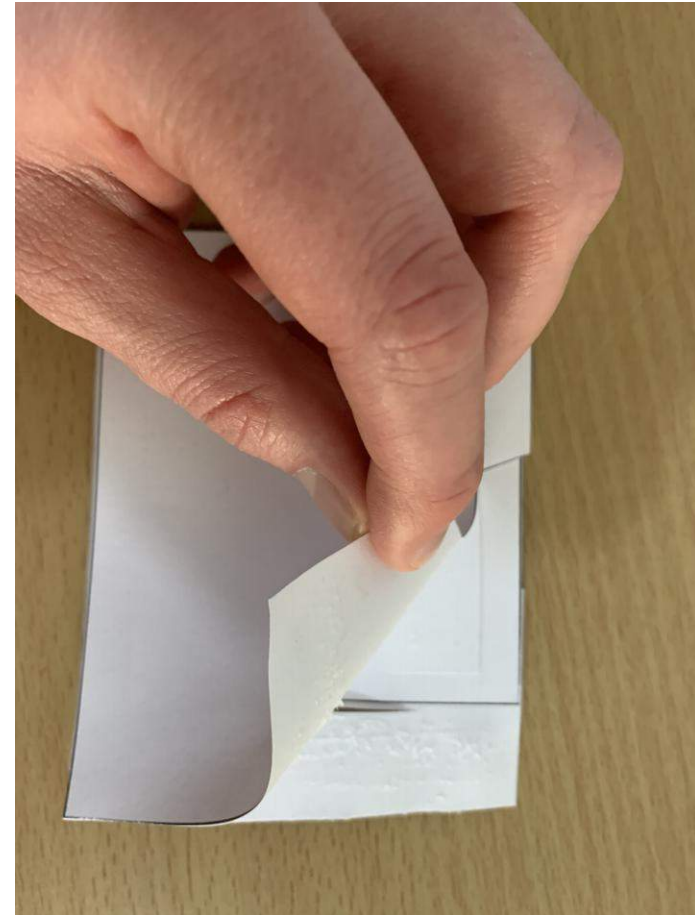

**NATIONAL  
FOOTBALL  
MUSEUM**

Step 8: Turn it over and glue the top part of the picture only and all the outsides of the borders.

**GOAL<sup>®</sup>  
CLICK**

Step 9: Glue the 'back' piece on so that it covers the inside mechanics of the polaroid.

Step 10: Pull the tab at the back and view the picture slide out!
